

ACADIAN
CONTRACTORS, INC

Shared Roots. Independent Strength.

ACADIAN
CONTRACTORS, INC

Built On Vision. United By Excellence.

With roots stretching back to 1947, Broussard Brothers and Acadian Contractors share a proud legacy of service, innovation, and growth in support of the energy industry. What began with one tugboat in Chalmette, Louisiana, has evolved into two dynamic companies providing integrated solutions across marine, land, and industrial markets.

Broussard Brothers, founded by the three brothers, John Huey Broussard, N.R. "Pedo" Broussard, and Joseph "Bula" Broussard, established its presence in Intracoastal City in 1959, where it transformed six acres of marshland into a premier dock and crane facility. Over the decades, the company built an expansive fleet of marine construction vessels and diversified into pipeline and land construction, earning a trusted reputation for delivering quality, value, and reliability.

Acadian Contractors was born from that same entrepreneurial spirit in 1973, with a focus on fabrication and offshore construction. From its beginnings on Highway 14 in Abbeville, the company expanded to a 125-acre waterfront facility and grew into a fully integrated provider of fabrication, coatings, construction, logistics, and project management services. Today, Acadian supports multiple industries globally with the expertise and scale to deliver large, complex projects with precision and safety.

Together, these affiliate companies—still led by the Broussard family— represent nearly a century of combined experience and a shared commitment to excellence. As Acadian Contractors and Broussard Brothers continue to grow, our mission remains clear: to deliver dependable solutions that enhance industry standards.

Industries We Are Proud To Serve

Aerospace

Acadian Contractors provides advanced fabrication and field services for aerospace applications, including launch pad infrastructures and maintenance.

Subsea

Acadian Contractors provides Subsea Fabrication Services, supporting the construction and maintenance of subsea infrastructure for offshore projects.

Agriculture

Broussard Brothers now offers Agricultural Services, including grain loading and unloading, while Acadian Contractors builds large-scale loading systems for agriculture terminals.

Utilities & Municipalities

Acadian Contractors serves utilities and municipalities with Gas Distribution and Infrastructure Construction Services.

Entertainment

Acadian Contractors is expanding on the East Coast, providing fabrication and coatings for major entertainment facilities, including some of the nation's largest theme parks.

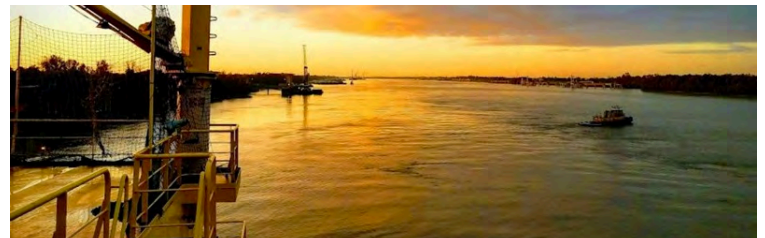

Liquefied Natural Gas

Acadian Contractors serves Liquefied Natural Gas providers with reliable offshore construction and maintenance services.

Upstream / Midstream / Downstream

Together, the companies cover the oil and gas sector. Broussard Brothers specializes on marine construction, pipelines, and decommissioning, while Acadian Contractors provides fabrication, construction, and project management.

Marine Terminals

Broussard Brothers operates a full-service dock and crane facility in Intracoastal City, supporting marine terminals across the Gulf Coast. Acadian Contractors provides large-scale fabrication support for domestic marine terminal providers.

Our Mission

Broussard Brothers, Inc. is dedicated to providing the highest quality service to customers by maintaining top standards

Our Vision

Aiming to be the best full-service marine and land contractor capable of adapting to customers' evolving industry needs.

Experienced Personnel

Employing a team of highly experienced professionals, some being fourth-generation employees, highlighting a deep-rooted expertise in the industry.

Commitment to Excellence

Consistently upgrading equipment and providing continual training to employees to meet the changing demands of the industries served.

Your company's ideal resource for everything from oilfield construction and pipeline services to marine towing, barge and crew boat rentals, dock and crane services, and more.

ACADIAN CONTRACTORS, INC

Our Mission & Vision

Striving to be the preferred provider of family-first, incident-free, reliable services with quality solutions delivered by a world-class execution team.

Core Values: Acadian F.I.R.S.T.

Family — Why We Work

Incident-Free — What We Strive For

Reliable — What Our Customers Deserve

Solutions — Our Commitment

Team — The Foundation of Our Success

Quality Assurance

Embedding a culture of quality across all levels, from management to floor personnel, to ensure excellence in service delivery.

Health, Safety & Environmental (HSE) Commitment

Implementing proactive, behavior-based HSE processes led by senior leadership to foster a safe work culture.

Company Certifications

ISO 9001:2015 - AISC (BU) Building Fabricator - ASME U Stamp and NBIC R Stamp - Reflecting Adherence to Industry Standards.

Personnel Certifications

ICWI AWS QC1 - NACE I - NACE II - NACE III - AMPP Basic Coatings Inspector - AMPP Senior Coatings Inspector - SSPC Level 2 Coatings Application Specialist - LA State Fire Marshall Pre-Engineered System, Fire Extinguisher & Hoses Certification - Competent Person, Advanced Hands On, Loading, and Suspended Scaffolding Certification.

Our Humble Beginings...

1947

Broussard Brothers is founded by John Huey Broussard, N.R. "Pedo" Broussard, and Joseph "Bula" Broussard, in Chalmette, LA with a single tugboat.

1970s

Broussard Brothers expands its marine services with dredging, levee, and rock work capabilities.

1980s

Broussard Brothers adds its first pipe lay barge to support pipeline installations.

1990s

Broussard Brothers expands its fleet, doubles its workforce, and begins serving the agricultural market with grain loading services.

ASME
SETTING THE STANDARD

2007

Acadian receives ASME "U" stamp certification.

1959

Broussard Brothers relocates to Intracoastal City and opens full-service dock and crane facility.

1973

Acadian Contractors is founded in Abbeville, LA as a fabrication and offshore service company.

1989

Acadian relocates to a 125-acre waterfront facility on the Vermilion River to accommodate larger offshore fabrication.

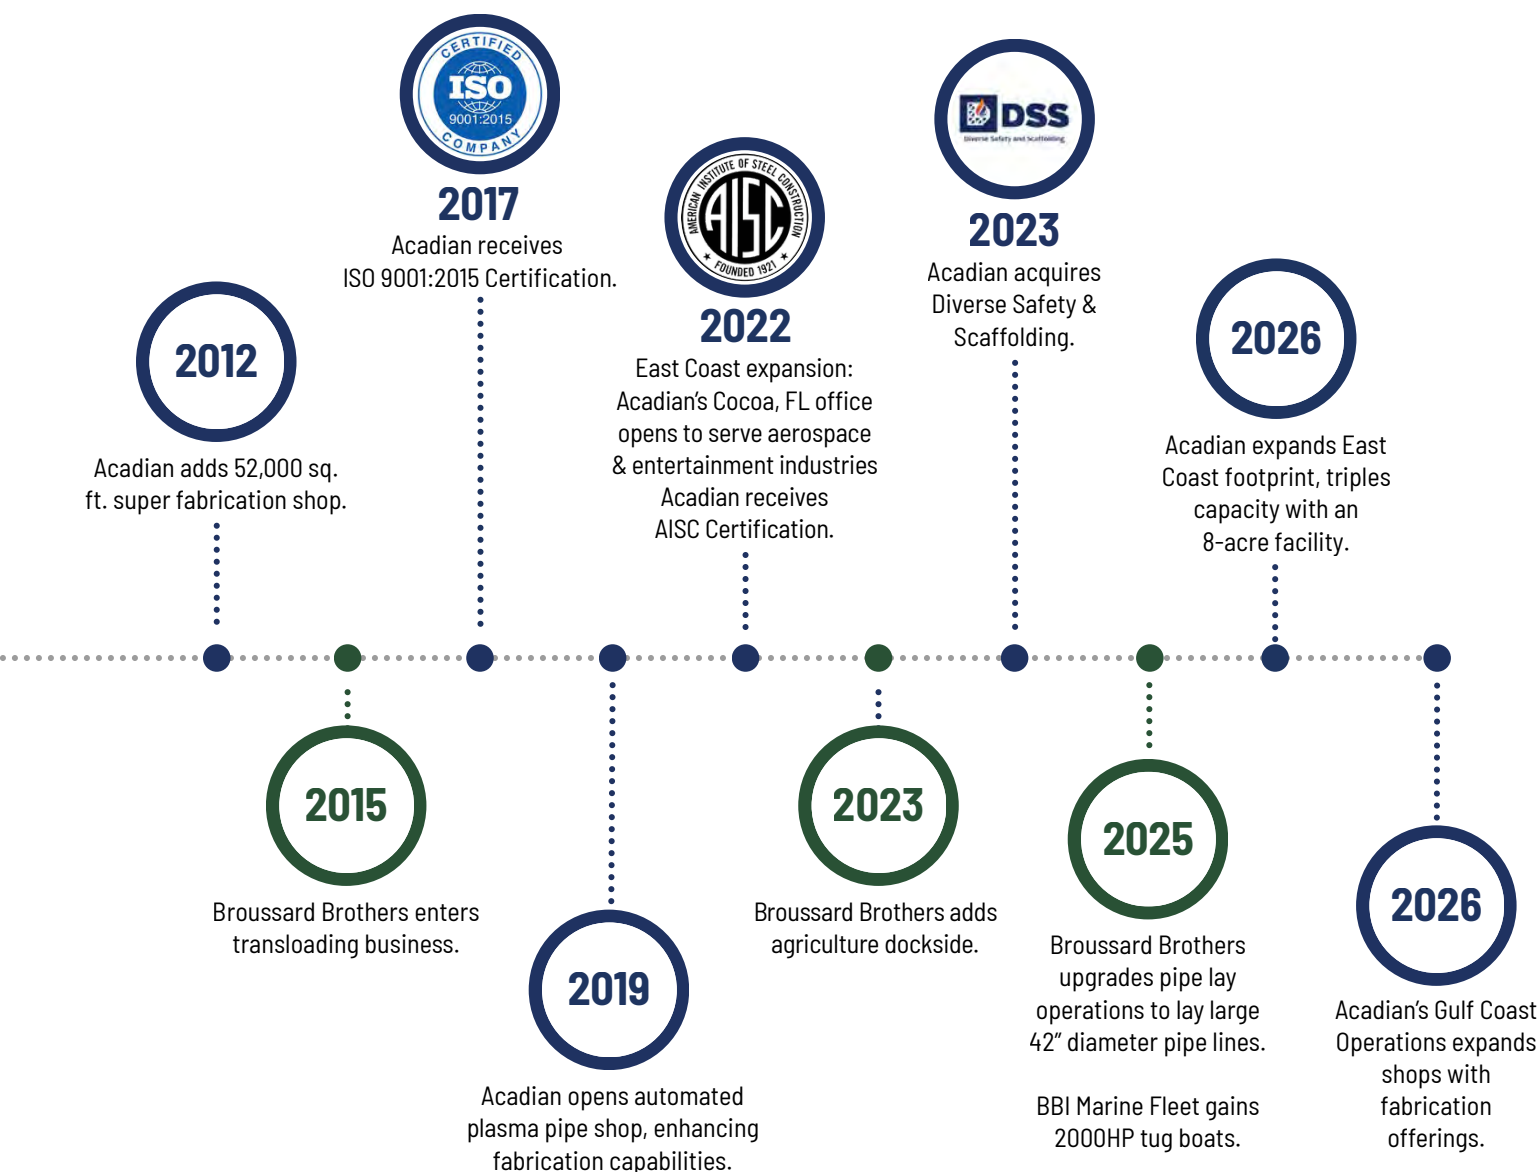

2004

Acadian receives NBIC "R" stamp certification.

2011

Acadian opens eco-friendly indoor control coatings facility.

...to Who We Are Today.

Construction Services

Construction Services

Marine Construction Services

Full-Scope of Services

Broussard Brothers covers a spectrum of marine construction services, from pad construction to production work, decommissioning, and more.

Our experienced team handles projects of all sizes while maintaining a strong focus on quality and safety.

- Life-cycle support; Facility Construction, Including Repair & Maintenance, and decommissioning
- Construction of Any Size & Length of Pipeline in the Marsh, Bays, & Shallow Waters of the Gulf of America
- Pipeline Excavation, Repair, Lowering, Burial, & Hydro-Testing
- Caisson Services
- Installation of Shallow Water Drilling Locations, Including Limestone Pads, Clusters, & Keyways
- Complete Well Hook-Ups, Including the Installation of Inland Platforms, Shallow Water Jackets, & Decks
- Installation of Dock Facilities With Steel Bulkheads & Dolphin Pilings
- Bank Stabilization Such As Rip-Rap & Cement Mats
- Dredging & Levee Construction

Our Crane Barges

Lifting From 30 to 250 Tons

Our crane barges are engineered to handle everything from routine lifts to complex heavy-haul operations.

Their versatility supports critical tasks like compressor installations, platform maintenance, and equipment removals across both inland and coastal environments.

Land Construction Services

Anomaly Digs

Our anomaly dig services are executed with precision and care, whether we are working in active, high-risk environments or developing new right-of-way installations.

With decades of experience, our crews identify, excavate, and remediate pipeline anomalies safely and in full compliance with industry standards. Using advanced equipment and strong safety practices, we work efficiently while reducing environmental impact and downtime.

Pipe Lay Operations

Marine Pipeline Capabilities

Our marine pipeline capabilities range from marshland to a depth of 30 feet of water in the Gulf of America.

We also have the capabilities to lay, jet and bury pipeline simultaneously, as well as the ability to do multiple lines at the same time. Over the years, we have installed pipelines of various lengths and sizes, from 2" to 42" pipeline installations, across the Gulf Coast of America.

Marine Fleet

Marine Fleet

Our Fleet of Tugboats

2000HP | 1200HP | 900HP | 600HP

Broussard Brothers offers your company one of the most impressive fleets in the marine construction and towing industries.

Our tugboats are utilized for towing, construction, rig tending, and support for drilling rigs both inland and in the Gulf of America. All Broussard Brothers' vessels have licensed captains and experienced crews who undergo rigorous training to ensure safe operations and environmental responsibility.

MR GUY 48 FT

Our Fleet of Crew Boats

Marine Transfer Capabilities

Our boats are licensed for transporting crews of 6 to 23 people.

Broussard Brothers also offers several inland deck boats for use. All Broussard Brothers' vessels have licensed captains and experienced crews who undergo rigorous training to ensure rigorous training to ensure safe operations and environmental responsibility.

Fabrication Services

ACADIAN
CONTRACTORS, INC

Your Source Fabrication Provider

For Over 50 Years...

Acadian Contractors has delivered trusted fabrication services to energy providers around the world.

Our expertise spans multiple industries—including oil & gas, aerospace, marine terminals, and subsea—backed by a legacy of precision, safety, and reliability. As a fully integrated provider, we handle projects of all sizes with a commitment to excellence, innovation, and customer satisfaction.

Our Capabilities At A Glance

Located on 125 acres along the Vermilion River, our ISO 9001 & AISC certified facility is built for scale, complexity, and precision.

- Specialized Shops for Exotic Metals
- 100,000+ sq. ft. Covered Work, Secured Facility
- Automated Beam & Pipe Cutting Technology
- 24/7 Control Coatings Blasting & Painting Shop
- Climate-Controlled Facilities for Consistency
- Seamless Unrestricted Access to the Gulf of America
- Three Off-loading, 200 Class; Truck Cranes - Heavy Lifting Capabilities

Fabrication Services Offered

- Structural Fabrication
- Platform Fabrication
- Modular
- Subsea Fabrication
- Marine Terminal Fabrication
- Pipe Fabrication
- Exotic Metal Fabrication

Fabrication Tailored to Your Specifications

Acadian Contractors stands as a testament to innovation and precision in fabrication services. Powered by cutting-edge technology, our facility boasts automation, specialized welding machinery, and CNC beam and pipe cutting capabilities.

Structural & Platform Fabrication

From skids to multi-level topsides, we deliver turnkey solutions with precision and efficiency.

- Full-scale offshore/onshore platforms
- Automation, CNC cutting & welding
- U.S. Gulf Coast & global project reach
- (for aero: Launch table, TE, Divertor, speed walls)

Subsea Fabrication

Acadian is one of the few Gulf Coast fabricators with true subsea specialization.

- PLEMs, PLETs, ILS, mud mats & jumpers
- Strategically located near offshore deployment
- Precision-built to your specs and timeline

Pipe & Exotic Metal Fabrication

We lead the region in pipe spool production and exotic alloy fabrication.

- Over 10k spools/month from 22k sq. ft. shop
- Inconel, Duplex, Copper Nickel & more
- Indoor painting & blasting to meet tight deadlines

Modular Fabrication

Modular builds allow us to pre-assemble, test, and ship complete systems—reducing your field time and increasing safety.

- Skid-mounted vessels, pumps, separators
- Pre-commissioning in a controlled environment
- Ideal for fast-track and remote deployments

Marine Terminal Fabrication

Expertise in building terminal infrastructure for crude, molasses, and more.

- Breasting & mooring dolphins, platforms
- Structural supports for loading systems
- Global shipping through our private dock

Offshore Services

ACADIAN
CONTRACTORS, INC

Trusted Offshore Construction Solutions for the Energy Industry

Acadian Contractors delivers safe, efficient, and reliable offshore construction services to the world's leading energy providers.

As licensed general contractors, we've completed projects across the Gulf, covering operations on the shelf and outer continental shelf. With more than 50 years of experience, our expert crews, innovative technology, and commitment to safety make us your go-to offshore construction partner.

Full-Scope Offshore Construction Capabilities

Our SEMS-compliant crews bring the experience and adaptability required to complete critical offshore tasks with precision and safety.

- Offshore Hookups
- Subsea Tiebacks
- Facility Upgrades
- Safe Out Operations
- Project Planning & Scheduling
- Procurement & Logistics
- Plug & Abandonment (P&A) Support
- Fabrication Integration
- Construction Management
- Scaffolding
- Fire & Gas Safety
- Cleaning
- IRIS
- Hydrolic Bolting & Torquing

Strategic Advantage Built For Offshore Response

Located just minutes from the Gulf, our headquarters and field services yard enable rapid mobilization to meet your offshore needs – without delay.

- Proximity to the Gulf
- Specialized Field Services Team
- Rapid Deployment Capabilities

Safety First, Always

Safety isn't just a protocol – it's a core value. We maintain an industry-leading safety record through constant training, leadership engagement, and proactive hazard identification.

- SEMS-Compliant Teams
- Job Safety Analysis (JSA) Focused
- Dedicated HSE Oversight

Construction Management Built for Today's Demands

From planning to final commissioning, our construction management team ensures projects are delivered on time and within budget – without compromising safety or quality.

- Owner/Construction Manager Collaboration
- Cost Tracking & Quality Control
- Tailored Execution for Capital Projects

Cloud Solutions: Modern Project Oversight

Powered by our proprietary cloud-based platform, ACloud Solutions streamlines construction project management.

- Real-Time Tracking
- Transparent Collaboration
- Informed Decision-Making
- Mobile Access for Field Crews

Why Acadian?

The Offshore Construction Advantage

- Over 50 Years of Industry Experience
- Trusted by Leading Energy Providers
- Comprehensive, Turnkey Services
- Responsive Field Teams
- Built-In Technology Integration

Whether it's a complex hookup, critical upgrade, or full-field installation, Acadian Contractors brings the tools, team, and technology to deliver safe, smart, and seamless offshore construction results.

Field Services

ACADIAN

CONTRACTORS, INC

Reliable from Concept to Completion

Full-Scope Onshore Construction Solutions

At Acadian Contractors, we provide full-scope onshore construction solutions built for today's energy and infrastructure demands.

From land-based rigs to aerospace infrastructure, our experienced teams deliver dependable results – on time and on budget. With robust project controls and a commitment to safety and quality, we are your partner at every stage, from site prep to commissioning and ongoing asset support.

Our Onshore Construction Expertise

We bring together seasoned professionals, advanced equipment, and cutting-edge technology to deliver turnkey construction services across a wide range of sectors.

- Launch Pad Infrastructure
- Meter Stations
- Gas Distribution
- Facility Expansions & Modifications
- Aerospace & Industrial Infrastructure
- Entertainment Facilities
- Renewables

Lifecycle-Focused Construction

We don't just build your assets – we help ensure their long-term integrity. Our asset integrity services include blasting, coatings, inspections, and maintenance to extend performance and uptime.

- Turnkey Builds + Long-Term Support
- Fabrication Integration for Seamless Execution
- Coatings & Protective Systems Built-In
- Modular Fabrication to Reduce Cost

Aerospace Precision in Flight

Fabrication & Coatings

Precision Built. Protection That Lasts.

We deliver high-quality fabrication and advanced coating solutions that support the demanding needs of aerospace infrastructure. From precision-built components to corrosion protection, our team helps ensure critical structures are built to perform and protected for the long run.

- Precision Fabrication for Aerospace Components
- Advanced Coatings & Corrosion Control
- Asset Integrity, Inspection, Maintenance & Repair

Construction Services

From Groundwork to Final Lift

Supporting aerospace projects from site preparation to structural completion, Acadian provides safe, efficient construction services for launch pads, support structures, and related facilities. With in-house capabilities and experienced crews, we help keep complex projects moving with precision and reliability.

- Launch Pad & Infrastructure Construction
- Scaffolding, Crane Support & Site Services
- Onshore & Offshore Construction Capabilities

Why Choose Acadian?

From conception to completion, support through all aspects of project implementation is critical for the success of aerospace projects. Collaborating with a powerhouse company that offers a comprehensive range of in-house services can significantly benefit aerospace companies in several impactful ways:

- Comprehensive Solutions and Expertise
- Flexibility and Adaptability
- Quality Assurance and Control
- Long-term Relationship and Collaboration
